

Mr. Frank J. Serna

**Director, Systems Engineering
Draper Laboratory
555 Technology Square
Cambridge, MA 02139-3563**

Mr. Serna is the Director of Systems Engineering at Draper Laboratory. The scope of programs in the Systems Engineering Directorate includes the full scope of Draper Laboratory programs: Guidance Systems for Trident II, NASA Manned Space Programs; low power electronics and biomedical systems. These programs span feasibility demonstrations, to low rate production.

Mr. Serna is vice-chair of the NDIA, Systems Engineering Division. He has over thirty years of experience in organizations involved in contract research, development, and systems integration projects for national security sponsors.

Mr. Serna holds degrees from Yale University and Northeastern University.
